SEEIS, FERTILIZEIS, &c.

THE undersigned is now prepared to furnish the above mentoned and all articles pertaining to the agricultural issuences at the lowest market rates; having just returned from a tour through the northern and New England States, where he has visited a large number of the principal agricultural manufacturing establishments, from which he has taken great pains in selecting a choice assortment of implements and machinery of all descriptions. He has also made arrangements to be at all times in receipt of any important improvements that may take place in the agricultural line. Another very important feature in this new establishment is, that the proprietor is a practical agricultural machinist, with an experience of twelve years. He has thereby acquired a thorough knowledge of this business in all its various branches. He therefore feels justified in saying that he can obtain and furnish all articles in his line on as reasonable terms as any house in this country.

Machinery of all descriptions repaired at the shortest notice and on the most reasonable terms.

With the above experience and facilities for conducting this business, (which is all important,) he respectfully solicits the patronage of the farming community and public generally. R shall always be his object to please.

Yours, very respectfully,

The Fauquier White Sulphur Springs,

IN VIEGINA, OFFERED FOR SALE TO THE PUBLIC IN LOTS.

THIS property has been held under an act of incorporation since 1838. The chartered property then consisted of 1,183 ½ nores of land, in Faquiter county, including the imprevements thereon, and was divided into 2,500 shares, estimated in the charter at 100 each. The subscriber having subsequently reacquired the property, sold a part thereof, and there now remain fully eleven hundred acres, together with the buildings enlarged and greatly improved. The more easily to sell such a property, and to increase it value, he has laid off the larger profus of the land into about 10 00 building lots, with contention streets, of 66 feet width, running nieth and south, east and week, with a view to the formation of a village or city, to be called "Warrenton springs." These lots nearly surround the reserved sixty five acres, which include the Sulphur Springs and all the contiguous buildings and ingrevements. These sixty diveacres, also, are offered for sale, in 2,500 shares, in connection with the lots; the whole 12,500 lots and shares being estimated at 10, each, and when taken to be partitioned by lot; those getting the 2,500 shares will constitute the corporation under the amended charter of February 2, 1864, known as the Fanquier White Sulphur Springs Company; and those potting the respective lots will receive their deeds from Mr. Ro. Hodgin, a gentleman of the highest character and business qualifications, to whom, as trustee for the purpose, the outler preperty has been correyed.

The valuation of this property by the sworn officer of the Common. OFFERED FOR SALE TO THE PUBLIC IN LOTS.

February 2, 1804, known as the ranquer white couplar Springs Conpany; and those gotting the respective joist will receive their deeds from Mr. Ro. Hodgin, a gentleman of the highest character and business qualifications, to whom, as trustee for the purpose, the entire pessery has been corresped.

The valuation of this property by the sworn officer of the Commonwealth shows that the buildings alone are worth \$20,000; the assessment per acre is put at \$84. Such property requires more theral expenditures for the public accommodation than individuals are able or willing to risk, and the fact that so many will be interested in the avecess of the Springs, and in building around them, will probably double, immediately after the company is formed, the present estimate, a gularitor will, in the words event, get a lot (of the almost salvereal dimensions in NoW Yark) for the sum of ten dellars. He will get a lot on which he can build, at the very fountain of bealth; he may reside on it for the summor easeon only, or for the gens. The indus-ments to build will be tree-sitable; and the fact of such buildings being erected will immeasurably enhance the value of the Springs and of the lots. There is no reason why a city of magnitude should not rise up and flourish at this place. The Rappahamnock river is navigable to the spot. A very little energy would always keep the focks in repar. The Alexandria and Lynchburg railroad crosses the river about 5 or 5 miles below this land. Coal, at a cheap rate, may be unloaded from the care mito the boats. Indefinite steam power may thus be commanded at will; and the facility of transportation gives the same advantages which Lowed has for unlimited business. The railroad, already within 6 miles, will soon extend to New Orleans, whose inhabitants may the reach those Springs in three days. As beauthy a spot as any in Virginia—in an abundant region—with all these facilities why should not a city thrive and proaper here? At all events, around these health, living waters, already so extensively

Norg.—1. All the streets are 60 feet wide, and run north and south, east and west.

2. Each square, in the plan, fronts 250 feet on streets running east and west, and 220 feet on streets running north and south, and tis portion of the streets and siley; contains about two acres.

3. No payment of even the \$10 is required till it is ascertained, by the number of subscribers, that a city is to be built; in which event the value must greatly exceed the cost.

4. In the partition, the 10,000 lots will be represented by tokens, with the number of square and of lot on each. These tokens will be put in the same veased with 2,500 similar ones, marked "1 share of stock." In another vessel subscribers' names will be put, (each name repeated according to the number of shares he may have taken,) and in the drawing, as in the division of large estates among numerous heirs, each will thus have an equal chance with any other of going a share of Spring stock, or the more highly valued lot.

The 2500 who get the 55 acres, including the Suiphur Spring, the buildings, (ansessed at \$80,000.) and the furniture.

Those who get suitable building lots for large hotels may be still more successful, while those least fortunate will get building lots of 25 by 100 feet, that must be worth, as the population increases, much more than the cost.

5. Subscription lists and lithographic plans of the proposed city are left at most of the bookstores and other public places in tills city. The agents having them can become the representatives of the respective subscribers, and in surrendering the hists can get assurance of the deeds. The payments and the drawing are desired to be at the same time, or the subscriptor in this city will receive attention from Aug 1
